

## Moms + Babies Survival

**70,067**

babies and their mothers received Survival care last year.

**2,618**

Frontline Church Partners facilitate Survival programming in the countries where we serve

**25%**

of babies registered were identified as chronically malnourished and are receiving treatment

**33,841**

babies reached their 1st birthday and remained in our holistic child development program

## Program Success: Increased Breastfeeding Rates

**51%**

of babies in countries where Compassion works are exclusively breastfed.

**76%**

of babies in Compassion's Survival program are exclusively breastfed.

Mothers living in poverty are more likely to experience trouble breastfeeding due to a multitude of factors, including malnutrition and a lack of breastfeeding education and support.

To help mothers overcome these obstacles and help protect the health and nutrition of their newborn babies, every Survival program mother receives breastfeeding education and additional support if they experience issues.

BABY & MOM SURVIVAL

## Looking Ahead: Projected Impact

**16%**

Survival plans for this year show a 16% increase compared to last year, indicating significant growth.

**\$51M**

Africa is the region with the highest Survival needs, with \$51 million in planned programming over the next three years.

Uganda      The Philippines      Colombia  
**90**      **68**      **37**

Countries with the most planned Survival launches through June 2028 in each region.
